Hey Kathy - I know you said it was fine to send this to Dan today, but I think I need a bit more guidance. I made up a quick ten slide presentation, which allows for about 3 minutes per slide (you said 30 minutes). However, I emailed briefly with Dan and I know Corps is also delivering information at this presentation, so I'm not totally clear on what exactly the EPA presentation needs to include.

Dan, here are PPTs I had hoped to merge. The facilitating state Tribal assumption one is short and sweet, but does not cover the process or requirements. It also needs to include bullet on Wheeler letter.

The Assumption 101 IN is one you could use, it is long, but take off the assumable waters subcommittee and change R5 specifics to EPA and it should be good.

- Kathy

I sent this to the Corps as a placeholder, the branch chief was curious about what might be in our presentation, and I figured it would be generally "just the facts." and "if you want more info, call EPA." It's copied directly from a factsheet. Corps will discuss the latest thing on how assumable waters are described. The presenter in this case the Buffalo District's Regulatory Tribal Nation coordinator, he happens to be one of their enforcement staff working in NY State, and we know him well. I guess I'd rather have someone in the program, who is known by the NY tribes, give this presentation rather than an EPA public affairs person who primarily deals with great lakes and superfund issues.

- Dan
